Graduate Program in Pharmacotherapy and Experimental Therapeutics:
Objective – To prepare graduate and postgraduate students for leadership positions in translational research within academic, industry, or government settings. For more information: <http://www.pharmacy.unc.edu> For online applications: <http://gradschool.unc.edu>.
For students entering their last or next to last year of study, AstraZeneca has a twelve-week internship focusing on a specific area of interest for the student. The application deadline is January 31, 2006. Go to www.astrazeneca-us.com. Click on Careers and under Quick links click on Pharmacy Internship Program for further information. Students can download the application from the site.

The University of North Carolina at Chapel Hill Graduate Program in Pharmacotherapy and Experimental Therapeutics

Objective

To prepare graduate and postgraduate students for leadership positions in translational research within academic, industry, or government settings.

Educational Opportunities

Doctor of Philosophy (Ph.D.)
Postdoctoral Fellowships

Concentration Areas

Clinical Research
Drug Metabolism and Transport
Pharmacokinetics/Pharmacodynamics
Laboratory-Based Models of Human Disease

Stipend and Tuition Support

Teaching and Research Assistantships

UNC Environment

The University of North Carolina at Chapel Hill offers a wonderfully diverse and collaborative atmosphere for graduate and postdoctoral studies. The School of Pharmacy is located on the UNC Health Affairs campus with the Schools of Medicine, Public Health, Nursing, and Dentistry. Collaborative relationships with a number of programs and centers on campus foster opportunities for research and study with some of the leading researchers and educators in the nation. Examples include: the Carolina Center for Genome Sciences, the Center for AIDS Research, the Center for Infectious Diseases, the Lineberger Center for Cancer Research, the Center of Gastrointestinal Biology and Disease, the Liver Transplant Program, and the Center for Cardiovascular Disease.

UNC
PHARMACY

Up to five undergraduate students presenting research abstracts will receive travel funding to attend the 2006 SOT Annual Meeting through the Pfizer Undergraduate Student Travel Awards. Awardees will be selected based on the quality of the submitted poster and their advisor's supporting recommendation. The selected undergraduates will receive travel assistance and recognition at the Awards Ceremony, be matched with a graduate student and a Pfizer scientist to mentor them during the meeting, and attend special events.

Full program description and the application are linked to the SOT Awards listing on <http://www.toxicology.org/ai/af/awards.aspx>. Questions may be directed to MemberServices@toxicology.org.
