

Introductory Pharmacy Practice Experiences (IPPE)

Purpose: Expose students to common contemporary US practice models, including interprofessional practice and direct patient care activities and establish a solid practice foundation on which students will continually build as they progress through the Doctor of Pharmacy curriculum.

150 150

Minimum 300 hours of experience balanced between community and health system settings

Placement: Purposely integrated into the didactic curriculum and consistently expose students to activities, in graded fashion, to enable growth in student's abilities

Introduction to Community Pharmacy Practice

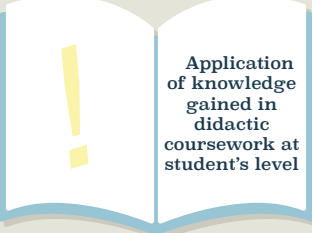

120 HOURS

Providing patient-centered care in a community pharmacy setting

•

3 weeks during summer after P1

WHEN/WHERE

!

Application of knowledge gained in didactic coursework at student's level

EMPHASIS

Delivery of care to patients

Dispensing of medications

ACTIVITIES

Introduction to Health Systems Pharmacy Practice

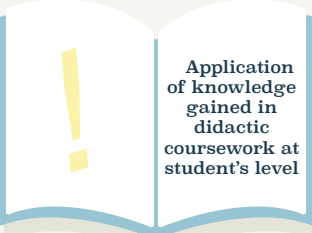

120 HOURS

providing patient-centered care in a health systems setting

•

3 weeks during summer after P2

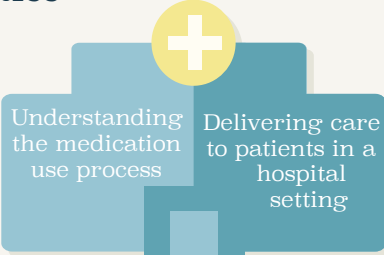

WHEN/WHERE

!

Application of knowledge gained in didactic coursework at student's level

EMPHASIS

Understanding the medication use process

Delivering care to patients in a hospital setting

ACTIVITIES

IPPE: General Medicine I

90 HOURS

Continuum of patient care activities throughout the third professional year

Emphasizes the Pharmacist's Patient Care Process

Practice site time gives opportunities to engage IPPE students in patient care activities including interactions with patients, caregivers, and other health care professionals; and to apply their patient care knowledge and skills in authentic practice settings

After IPPE, students will meet the following ACPE Pre-APPE Core Domains:

- | | | |
|--|---|--|
|  Basic Patient Assessment |  Mathematics in Pharmacy Practice |  Medication Information |
|  Public Health |  Insurance/Rx Drug Coverage |  Counseling Patients |
