

UNIVERSITY OF MISSOURI-KANSAS CITY

# COMMUNITY-BASED PHARMACY RESIDENCY PROGRAMS

Offering ASHP/APhA-accredited PGY1 community-based residencies  
with recognized leaders in community practice since 2001

## MISSION

We develop confident, effective and innovative community pharmacy practitioners who advance the profession and improve community health by providing superior patient care in a financially sustainable manner.

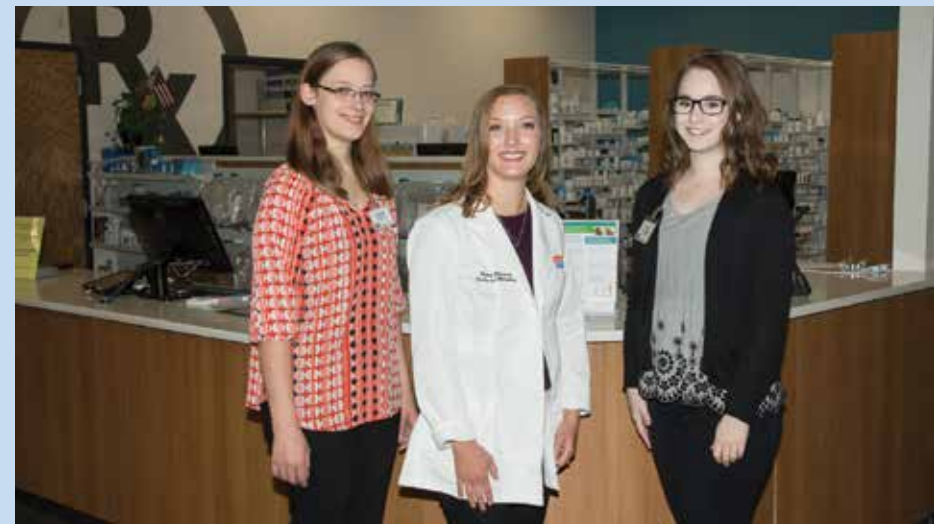

## ABOUT THE PROGRAMS

### The resident will (depending on practice site):

- Provide medication therapy management and care coordination
- Provide disease state management
- Develop new and continue existing patient care programs
- Charge for their services
- Provide community outreach and group educational programs
- Perform practice management and managerial functions
- Participate in grantsmanship
- Complete a practice-based research project
- Travel to national and state pharmacy meetings

### Valuable teaching experiences include:

- UMKC Resident Teaching Program
- Classroom teaching
- Precepting students
- Community education
- In-services for other health professionals, including physicians

## RESIDENCY SITES

**Balls Food Stores** is a family-owned supermarket chain local to the Kansas City area. It includes 27 grocery stores with 20 pharmacies. The residency is based in a Price Chopper supermarket in Grandview, Missouri, designed for patient care. The company provides outstanding corporate support for pharmacy services and received the 2018 Pinnacle Award from the APhA Foundation for demonstrating exceptional leadership in enhancing health care quality and medication use.

**L&S and Medical Arts Pharmacy** are second generation, family-owned community pharmacies in Southeast Missouri. The residency is based out of the Charleston, Missouri site. These pharmacies are nationally known leaders in community practice because of their skills in practice innovation including pharmacogenetics and the incorporation of community health workers into the community pharmacy. They are leaders in CPESN USA working diligently to transform community pharmacy into a patient-centered practice.

The **KC CARE** Community-Based Pharmacy Residency Program is a longitudinal training experience with emphasis in public health and academia at the KC CARE Health Center, a Federally Qualified Health Center in Kansas City, Missouri. The purpose of this residency is to accelerate the resident's growth beyond entry-level professional competence in the provision of patient-centered pharmaceutical care services to at-risk, resource poor, and/or disparate populations within Kansas City. The clinical resident practices Medication Therapy Services, guided by a collaborative practice agreement with the authorizing physician, to provide medication management for a variety of chronic illnesses including diabetes, hypertension, dyslipidemia, asthma, COPD, GERD, hypothyroidism and HIV. The resident also manages therapy for HIV Pre-Exposure Prophylaxis (PrEP) and Post-Exposure Prophylaxis (PEP) and supports dispensing services in our 340B pharmacy one day per week.
