

## Policy Name: Doctor of Pharmacy Student Urine Drug Screens

11/3/15

**Policy Statement:** The purpose of this Policy is to inform prospective and current Doctor of Pharmacy students about Urine Drug Screens (UDS), when UDSs are collected, how the information obtained from a UDS is or may be used, and possible ramifications of positive findings in a UDS.

Students will be required to complete a UDS annually prior to starting their summer IPPE's and again prior to starting APPE's. UDS's are obtained utilizing the SOP's contracted agency. Students will be provided specific instructions on the proper procedures for completing the UDS. Students will register and pay for the UDS through the contracted agency. The contracted agency handles all of the chain of custody paperwork by direct communication with the student. The contracted agency handles all interpretation of results: any test that shows positive is retested. If it again is positive, then the test is sent through the Medical Review process. The contracted agency has a designated Medical Reviewer who makes individual contact with the student in question to verify collateral information e.g. student must produce a valid prescription to justify the positive result. If a valid prescription is submitted, the UDS test is then ruled "negative" and if no valid prescription is submitted to justify the result, then it is ruled as "positive".

Results of these UDSs will be provided to the Director of Experiential Learning. Any positive results that remain after the contracted agency has completed their Medical Review will be forwarded to the Associate Dean for Student Affairs for review. Should any findings on these UDS's require additional action by the School of Pharmacy, such action shall be taken in accordance with applicable School of Pharmacy policies and procedures including the case being remanded to the [SOP Honor Council](#) for review and disposition.

Students are responsible for any costs associated with the UDS's.

Many affiliated sites require completion of a UDS prior to beginning the affiliation experience (summer IPPE's and APPE's). Some affiliated sites may have additional requirements with which the student must comply in order to have an educational practice experience at that site; this may include requiring an additional UDS or other screenings beyond those required by the School of Pharmacy.

If an affiliate site requests a copy of a student's UDS results for the purpose of vetting the student at the practice site, the student is responsible for providing a copy of the results to the site. Affiliated sites have the right to deny any student from participating in any educational experience at that site. The School of Pharmacy is not responsible if a student is unable to be placed in an educational experience at any affiliation site because of findings on his/her UDS.
